

STATE OF OREGON  
COUNTY OF YAMHILL  
PERMIT TO STORE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO  
SARBANAND ENTERPRISES LLC  
786 RD 188  
DELANO CA 93215

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: R-89191

SOURCE OF WATER: RUNOFF, TRIBUTARY TO SOUTH YAMHILL RIVER

STORAGE FACILITY: POND 3

MAXIMUM DAM HEIGHT: 6.0 FEET

MAXIMUM VOLUME: 112.0 ACRE-FEET

PURPOSE OR USE OF THE STORED WATER: MULTIPURPOSE USE

WATER MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD: NOVEMBER 1 THROUGH MAY 31

DATE OF PRIORITY: DECEMBER 10, 2021

POINT OF DIVERSION:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
5 S	5 W	WM	35	NE SW	1650 FEET NORTH AND 2160 FEET EAST FROM SW CORNER, SECTION 35

RESERVOIR LOCATION:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
5 S	5 W	WM	35	NE SW	1415 FEET NORTH AND 2210 FEET EAST FROM SW CORNER, SECTION 35

THE AREA TO BE SUBMERGED BY THE RESERVOIR:

Twp	Rng	Mer	Sec	Q-Q
5 S	5 W	WM	35	NE SW
5 S	5 W	WM	35	NW SW
5 S	5 W	WM	35	SW SW
5 S	5 W	WM	35	SE SW

## PERMIT SPECIFIC CONDITIONS

1. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.
2. **Water Use Measurement, Recording, and Reporting:**
  - A. Before water use may begin under this permit, a staff gage that measures the entire range and stage between full reservoir level and dead-pool storage shall be installed in the reservoir. If no dead-pool, the gage must measure the full depth of the reservoir. The permittee shall maintain the device in good working order.
  - B. The permittee shall allow the watermaster access to the device; provided however, where any device is located within a private structure, the watermaster shall request access upon reasonable notice.
  - C. The permittee shall keep a complete record of the volume of water stored each month and shall submit a report which includes water-storage measurements to the Department annually (or more frequently as may be required by the Director). Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
  - D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

3. **Agricultural Water Quality Management Area Rules:**

The permittee shall comply with basin-specific Agricultural Water Quality Management Area Rules described in Oregon Administrative Rule Chapter 603-095. The permittee shall protect riparian areas, allowing site capable vegetation to establish and grow along streams, while providing the following functions: shade (on perennial and some intermittent streams), bank stability, and infiltration or filtration of overland runoff.

4. **Fish Stocking:**

Per ORS 498.222 and OAR 635-007-0600, all persons transporting fish in Oregon shall have a fish transport permit issued by the Oregon Department of Fish and Wildlife (ODFW). The permittee shall not stock fish in the reservoir without a fish transport permit issued by ODFW. As part of the permitting process, the permittee shall also screen the inlet and outlet of their pond to ensure that fish cannot escape into public waters and/or to keep wild fish from entering the pond.

5. **Off-Channel Stored Water Releases:**

The permittee shall not release polluted water from this off-channel reservoir into waters of the state except when the release is directed by the State Engineer to prevent dam failure.

**6. Live Flow:**

Once the allocated volume has been stored, permittee shall pass all live flow downstream at a rate equal to inflow, using methods that protect instream water quality.

**7. Water Quality:**

All water use under this permit shall comply with state and federal water quality laws. The permittee shall not violate any state and federal water quality standards, shall not cause pollution of any waters of the state, and shall not place or cause to be placed any wastes in a location where such wastes are likely to escape or be carried into the waters of the state by any means. The use may be restricted if the quality of source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards.

8. The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe (with a minimum diameter of 8" for any in-channel reservoir). This requirement may be waived if the Department determines other means have been provided to evacuate water when necessary.

9. The permittee shall pass all live flow outside the storage season described above.

10. The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

11. The permittee may be required in the future to install, maintain, and operate fish screening and by-pass devices to prevent fish from entering the proposed diversion and to provide adequate upstream and downstream passage for fish.

12. This permit allows an annual appropriation (not to exceed the specified volume). This permit does not provide for the appropriation of water for out-of-reservoir uses, the maintenance of the water level or maintaining a suitable freshwater condition. If any water is to be used for out-of-reservoir purposes, a secondary water right is required. If any additional live flow is to be appropriated to maintain either the water level or a suitable freshwater condition, an additional water right is required.

**STANDARD CONDITIONS**

1. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

2. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
3. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

#### **DEVELOPMENT AND COMPLETION TIMELINE REQUIREMENTS**

1. Construction of the water system shall begin within five years of the date of permit issuance. The deadline to begin construction may not be extended. This permit is subject to cancellation proceedings if the begin construction deadline is missed.
2. The permitted volume of water shall be stored within five years of the date of permit issuance. If additional time is needed, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.
3. Within one year after storage of water, the permittee shall submit a claim of beneficial use to the Oregon Water Resources Department.
4. The claim of beneficial use shall be prepared by a Certified Water Right Examiner in conformance with the requirements of OAR 690-014 if an associated secondary permit exists for the use of stored water under this permit, or if the reservoir capacity is equal to or greater than 9.2 acre-feet.
5. If no secondary permit exists and the reservoir capacity is less than 9.2 acre-feet of water, the claim of beneficial use need not be prepared by a Certified Water Right Examiner. The information submitted to the Oregon Water Resources Department shall include:
  - a. the dimensions of the reservoir;
  - a. the maximum capacity of the reservoir in acre-feet; and
  - b. a map identifying the location of the reservoir prepared in compliance with Water Resources Department standards.

Issued APR 28 2023
