## Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

United States Bureau of Land Management  
(Name of Applicant)

of P. O. Box 37, Prineville, Oregon  
(Mailing Address)

State of Oregon, do hereby make application for a permit to construct the following described reservoir and to store the unappropriated waters of the State of Oregon, subject to existing rights.

If the applicant is a corporation, give date and place of incorporation

Government Agency

1. The name of the proposed reservoir is North Fork #4 Detention Dam

2. The name of the stream from which the reservoir is to be filled and the appropriation made is Reservoir is to be filled from a draw feeding into Sears Canyon tributary of Crooked River through underground flow.

3. The amount of water to be stored is 4.1 acre feet.

4. The use to be made of the impounded water is to retain spring run off for livestock consumption only  
(Irrigation, power, domestic supply, etc.)

5. The location of the proposed reservoir will be in Sec. 27  
(Give sections or townships to be submerged)

Tp. 20 S., R. 21 E., W. M., in the county of Crook

(a) State whether situated in channel of running stream and give character of material at outlet This reservoir is to be situated in a draw which is dry except for a short period during the spring run off.

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions This reservoir will be filled from melted snow flowing down the channel in which the reservoir is to be constructed.

6. The dam will be located in NW 1/4, Sec. 27  
(Smallest legal subdivision)

Tp. 20 S., R. 21 E., W. M. The maximum height will be 15 feet above stream bed or ground surface on center line of dam. The length on top will be 266 feet; length on bottom 0 feet; width on top 12 feet; slope of front or water side 3.5:1; slope on back 2:1; height of dam above water line when full 5 feet.  
(Feet horizontal to 1 vertical) (Feet horizontal to 1 vertical)

\* A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

2477

7. The construction of dam, the material of which it is to be built, and method of protection from waves are as follows: This dam will be constructed of a silty clay soil which contains some gravel and small rocks. No protection from wave action will be provided.

8. The location of wasteway with dimensions are as follows: The wasteway will be around the end of the dam. It will be 5 feet deep, 10 feet wide on the bottom and 20 feet wide on the top. The bottom 2 feet of depth will be in solid undisturbed earth and the top 3 feet will be composed of fill.

9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: There is no existing normal flow in this channel only a peak lasting a very short period of time. No outlet conduit is to be provided.

10. The area submerged by the proposed reservoir, when full, will be 7 acres, with a maximum depth of water of 10 feet; and approximate mean depth of water 5.6 feet.

11. The estimated cost of the proposed work is \$ 639.96

12. Construction work will begin on or before August 15, 1960

13. Construction work will be completed on or before January 1, 1961
