Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

I. BURKAU CI LAND NAME MONT (Name of Applicant)
of P.O. Bex 392 Eugene (Meiling Address)
State of CREGON, do hereby make application for a permit to construct the
following described reservoir and to store the unappropriated waters of the State of Oregon, subject to
existing rights.
If the applicant is a corporation, give date and place of incorporation
1. The name of the proposed reservoir is Whittaker CREEK RECREATION DAM Site
2. The name of the stream from which the reservoir is to be filled and the appropriation made is WHITTIKEP (RECK
tributary of Siuslaw River
3. The amount of water to be stored is
4. The use to be made of the impounded water is MCN INS TOR RECEPTIVE DICE
5. The location of the proposed reservoir will be in Sec. 2/ (Give sections or townships to be submerged) Tp. 165 R.EW., W.M., in the county of LANC
(a) State whether situated in channel of running stream and give character of material at outlet
- Bedrock, Normal Channel Sterage
(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions
······································
6. The dam will be located in NW14 SW14 SE14 , Sec. 21,
Tp. 185, R. S. W.M. The maximum height will be 5 feet above stream bed or ground
surface on center line of dam. The length on top will befeet; length on
bottom 46 feet; width on top 12" feet; slope on front
or water side NONE; slope on back NONE; height of dam above water line (Feet horizontal to 1 vertical) when full 12 feet.
*A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

8. The location of wasteway with dimensions are as follows: (EASTER of DAM) 4" 8 5 9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: (All dama serves natural stream damnets must be precided with an outlet conduct of two expansy and together to pass the normal flow of two stream of sort times. 10. The area submerged by the proposed reservoir, when full, will be acres, with a maximum depth of water of feet: and approximate mean depth of water feet. 11. The estimated cost of the proposed work is \$ 1500 00. 12. Construction work will be completed on or before 199 30 1991. 13. Construction work will be completed on or before 199 15 1991. 14. This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for correction. In order to retain its priority, this application must be returned to the State Engineer, with corrections on or before October 11 19 51.	waves are as jouows:	ish beard with 12' Coment fase. Comen
8. The location of wasteway with dimensions are as follows: (CAME C. DAM L'AS' 9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: (All dams across natural stream chancels must be provided with an autlet conduit, of such capacity and location to pass the natural flow of the recurs at any time) 10. The area submerged by the proposed reservoir, when full, will be acres, with a maximum depth of water of feet. 11. The estimated cost of the proposed work is \$ 1500 cc. 12. Construction work will begin on or before flag 30 feet. 13. Construction work will be completed on or before flag 30 feet. This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for correction In order to retain its priority, this application must be returned to the State Engineer, with correc-	Wings	
8. The location of wasteway with dimensions are as follows: (CANCE C) DAM "WAS" 9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: (All dams serves neutral stream channels must be provided with an outlet conduct, of such capacity and ionation to pass the location of the stream at any time) 10. The area submerged by the proposed reservoir, when full, will be acres, with a maximum depth of water of feet. 11. The estimated cost of the proposed work is \$ 1500 CC. 12. Construction work will begin on or before Aug 30 1941. 13. Construction work will be completed on or before Aug 30 1941. This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for correction. In order to retain its priority, this application must be returned to the State Engineer, with correction.	·
