

Reservoir Permit No. 3251

Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

I, ANDREW ESTERSON (Name of Applicant)

of 1117 N. Corbin St., McMinnville (Mailing Address)

State of OREGON, do hereby make application for a permit to construct the following described reservoir and to store the unappropriated waters of the State of Oregon, subject to existing rights.

If the applicant is a corporation, give date and place of incorporation

1. The name of the proposed reservoir is XXXXXX Two unnamed ponds

2. The name of the stream from which the reservoir is to be filled and the appropriation made is Unnamed creek for new pond and unnamed spring for existing pond. tributary of Terry Creek

3. The amount of water to be stored is 0.1 in each acre feet.

4. The use to be made of the impounded water is fish pond

5. The location of the proposed reservoir will be in Sec. 2 Tp. 4 S., R. 5 W., W.M., in the county of Yamhill

(a) State whether situated in channel of running stream and give character of material at outlet

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions

6. The dam will be located in Section 2, in Tp. 4 S., R. 5 W., W.M. The maximum height will be 2 feet above stream bed or ground surface on center line of dam. The length on top will be 4 feet; length on bottom 4 feet; width on top 2 feet; slope on front or water side Vert.; slope on back Vert.; height of dam above water line when full 2 feet.

\* A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

7. The construction of dam, the material of which it is to be built, and method of protection from waves are as follows: Concrete diversion dam

Banks of pond on three sides will be built of clay after bottom has been roughed out. Ave. height of banks above natural ground level will be maintained. Top of dam and to 1 foot will be maintained. Top width will be 10 feet.

8. The location of wasteway with dimensions are as follows: Over the top for the full width of the stream channel. Diversion dam

A 6" pipe with a turned up elbow will be installed to which an overflow riser will be screwed into the elbow, top to register with top of dam to serve as an overflow.

9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: 12" pipe 100 feet from dam end near the hill side of pond. (All dams across natural stream channels must be provided with an outlet conduit of such capacity and location to pass the normal flow of the stream at any time)

10. The area submerged by the proposed reservoir, when full, will be 2.74 acres, with a maximum depth of water of 4.5 feet; and approximate mean depth of water 2.5 feet.

11. The estimated cost of the proposed work is \$1000.00

12. Construction work will begin on or before July 1, 1910

13. Construction work will be completed on or before July 15, 1910
