Reservoir Permit No. 2011

Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

The Bureau of Land Management (Name of Applicant)

Box 200, Vale

(Mailing Address)

Oregon

do hereby make application for a permit to construct the following described reservoir and to store the unappropriated waters of the State of Oregon, subject to existing rights.

If the applicant is a corporation, give date and place of incorporation

1. The name of the proposed reservoir is

2. The name of the stream from which the reservoir is to be filled and the appropriation made is Un-named

tributary of Sucker Creek

3. The amount of water to be stored is 2000 acre feet

4. The use to be made of the impounded water is irrigation, power, domestic supply, etc.

5. The location of the proposed reservoir will be in Sec. 12 (Give sections or township to be submerged)

Tp. 23S, R. 15E, W.M. in the county of

(a) State whether situated in channel of running stream and give character of material at outlet Let a dam be built across creek and dam be built

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions from spring

6. The dam will be located in SW 1/4 Sec. 12

Tp. 23S, R. 15E, W.M. The maximum height will be 10 feet above stream bed or ground

surface on center line of dam. The length on top will be 200 feet; length on

bottom 210 feet; width on top 12 feet; slope on front

of water side 1:1; slope on back 1:1; height of dam above water line

A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

2894

7. The construction of dam, the material of which it is to be built, and method of protection from waves are as follows: A keyway will be cut and filled with the best concrete material taken from a pit in front of the reservoir. The dam will be built in layers not to exceed 4 inches and compacted with a set of rollers. The dam will be vibrated if necessary.

8. The location of wasteway with dimensions are as follows: (State whether over or around the dam) (State whether over or around the dam) Spillway around end of dam

9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: (All dams across natural stream channels must be provided with an outlet conduit, of such capacity and location to pass the normal flow of the stream at any time)

10. The area submerged by the proposed reservoir, when full, will be _____ acres. with a maximum depth of water of _____ feet; and approximate mean depth of water _____ feet.

11. The estimated cost of the proposed work is \$ 900.00
12. Construction work will begin on or before _____
13. Construction work will be completed on or before _____
