TATE ENGINEER

CERTIFICATE NO. 39785

Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

I, Edgar Woolfolk and Blanche Woolfolk (Name of Applicant)
of
OJ(Mailing Address)
State of Oregon , do hereby make application for a permit to construct the
following described reservoir and to store the unappropriated waters of the State of Oregon, subject to
existing rights.
If the applicant is a corporation, give date and place of incorporation Not Applicable
1. The name of the proposed reservoir is Woolfolk Reservoir
2. The name of the stream from which the reservoir is to be filled and the appropriation made is Salmon Creek
tributary of Grave Creek
3. The amount of water to be stored is6.55 acre feet.
4. The use to be made of the impounded water is Irrigation (Irrigation, power, domestic supply, etc.) 5. The location of the proposed reservoir will be in Sec. 2 (Give sections or townships to be submerged)
Tp. 34 S , R. 6 W , W.M., in the county of Josephine
(a) State whether situated in channel of running stream and give character of material at outlet in channel of running stream, outlet in coarse gravel
(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give
name and dimensions
6. The dam will be located in Gov't Lot 4 Sw 5 , Sec. 2 , (Smallest legal subdivision)
Tp. 34 S, R. 6 W, W.M. The maximum height will be 10 feet above stream bed or ground
surface on center line of dam. The length on top will be 390 feet; length on
bottom feet; width on top feet; slope on front
or water side 3:1 ; slope on back 2:1 ; height of dam above water line (Feet horizontal to 1 vertical)
when full

7. The construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the material of which it is to be built, and method of protection from the construction of dam, the
waves are as follows: This dam is built of material taken from excavation within
the reservoir, good quality sandy clay.
8. The location of wasteway with dimensions are as follows: The wasteway is around (State whether over or around the dam)
Northwest end of the reservoir in natural ground with a bottom width of 10 feet a
side slope of 1: 1 which returns emergency overflow to Salmon Creek below the day
9. The location of outlet from the proposed reservoir, with character of construction and dim
sions, are as follows: A 38 inch square concrete drop of 8 feet to a 4 feet square (All dams across natural stream channels must be provided with an outlet conduit, of such capacity and location to pas
conduit, 15 feet long, then into a drop structure to the creek
normal flow of the stream at any time)
10. The area submerged by the proposed reservoir, when full, will be
with a maximum depth of water of8 feet; and approximate mean depth of wa
11. The estimated cost of the proposed work is \$3500.00
12. Construction work will begin on or before February 4, 1966
13. Construction work will be completed on or before February 4, 1966
