Remarks: This application is for permit to enlarge reservoir already constructed under Permit R 253. Therefore some of the blanks above was not filled out as they were not applicable to this application. The present dam is well constructed of large stone laid in cement, and the enlargement will be by adding 10' in height of same style of construction.

The nearest qualified engineer is located about 40 miles from the reservoir site and at this time of year the roads are almost impassable. This would make the cost of an engineer very high. And as the project is a small individual affair, I hope you will waive some of the technical requirements.
