"CERTIFICATE NO. 56388

Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

I, Pinnacle Packing Co. Inc. by N	
of P. O. Box 1068. (Mailing address)	Medford,
State of Oregon 97501, do hereby	make application for a permit to construct the
following described reservoir and to store the unappropr	iated waters of the State of Oregon, subject to
existing rights.	
If the applicant is a corporation, give date and pla	ce of incorporation Medford, Oregon
in December, 1928.	
1. The name of the proposed reservoir isPinn	acle Packing Reservoir.
2. The name of the stream from which the reservo	ir is to be filled and the appropriation made is
Unnamed Stream, a trib. of S. Fk. Upt	on Slough, a trib. of Upton Slou
tributary of	
3. The amount of water to be stored is	9.2 acre feet.
4. The use to be made of the impounded water is	(Irrigation nower demostic symple etc.)
5. The location of the proposed reservoir will be in	Sec. 9
Tp37S., R, W.M., in the county ofJa	ckson.
(a) State whether situated in channel of running s	
Dam to be constructed in channel of Un	named Stream, a trib. of S. Fk.
Jpton Slough, heavy clay soil at outle	t.
(b) If not in channel of running stream, state how i	
name and dimensions	
6. The dam will be located in NWK NWK (Smallest leg	"Sec. 9, sal subdivision) (See remarks)
Tp. 37. S., R. 1. W., W.M. The maximum height u	vill be 7.0/feet above stream bed or ground
urface on center line of dam. The length on top will be	840 feet; length on
oottom	10 feet; slope on front
or water side; slope on back; [Feet horizontal to 1 vertical];	height of dam above water line
vhen full2.5 feet.	
• A different form of application should be used for the appropriation of	stored water to beneficial use. Such forms can be secured

8. The location of wasteway with dimensions are as follows: Account northeast corne features the same of the same		structed of clay material excavated fro
8. The location of wasteway with dimensions are as follows: Around northeast corne (State whater over a recurs the dam) f dam; being 10 feet bottom width, 20 feet top width and 2.5 feet n depth. 9. The location of outlet from the proposed reservoir, with character of construction and mensions, are as follows: Will construct a bypass diven from Unpamed Stream on east side of reservoir to bypass normal flow of stream if necessarily and be seen the second five of the trum it so the one to bypass normal flow of stream if necessarily and be seen the second five of the trum it so the one to bypass normal flow of stream if necessarily and be seen to submit you to bypass normal flow of stream if necessarily and be seen to submit you to bypass normal flow of stream if necessarily and be submit to be submit to bypass normal flow of stream if necessarily and be submit to be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and be submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily and the submit to bypass normal flow of stream if necessarily	torage area.	
8. The location of wasteway with dimensions are as follows: Around northeast corne (State waster over a recent the author of the proposed of dam; being 10 feet bottom width, 20 feet top width and 2.5 feet a depth. 9. The location of outlet from the proposed reservoir, with character of construction and mensions, are as follows: Will construct a hyphais diven from Unpamed Stream 10 east side of reservoir to bypass normal flow of stream if necessarily not be a seed of the proposed reservoir, when full, will be 1.6 acres, that maximum depth of water of 10.2 width hottom and provided the mean depth of water 5.25 feet. 11. The estimated cost of the proposed work is \$ 3,00.00. 12. Construction work will begin on or before one year from date of priority. 13. Construction work will be completed on or before october 1, 1978. County of Marion, This is to certify that I have examined the foregoing application, together with the accompanying and data, and return the same for In order to retain its priority, this application must be returned to the State Engineer, with ections on or before		
described by the first section of outlet from the proposed reservoir, with character of construction and mensions, are as follows: Will construct a hypass ditch from Unnamed Stream Chandle made to be provided with an outlet conduit, of math cases to be the section of the stream is any time. Desire side of reservoir to bypass normal flow of stream if necessary and the to be the stream is any time. Lech 2. width top, 1.5' width bottom and 1.0' in depth. 10. The area submerged by the proposed reservoir, when full, will be 1.6 acres, the a maximum depth of water of 10.5 feet; and approximate mean depth of water 5.75 feet. 11. The estimated cost of the proposed work is \$3,000.00. 12. Construction work will begin on or before the year from date of priority. 13. Construction work will be completed on or before to October 1, 1978. This is to certify that I have examined the foregoing application, together with the accompanying as and data, and return the same for th
