

Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

I, Max Wilson, agent and attorney for Frank T. Miller, Trustee
(Name of Applicant)
Joseph
of _____, County of Wallowa
(Postoffice)
State of Oregon

, do hereby make application for a permit to construct the following described reservoir and to store the unappropriated waters of the State of Oregon, subject to existing rights.

If the applicant is a corporation, give date and place of incorporation not incorporated

1. The name of the proposed reservoir is not named

2. The name of the stream from which the reservoir is to be filled and the appropriation made is not named

tributary of Prairie Creek a tributary of Wallowa River.

3. The amount of water to be stored is sixteen acre feet.

4. The use to be made of the impounded water is stock water only
(Irrigation, power, domestic supply, etc.)

5. The location of the proposed reservoir will be in Sec. 8, Tp. 2 S., R. 46 E.W.M. in
(Give sections or townships to be submerged)

Wallowa County

(a) State whether situated in channel of running stream and give character of material at outlet

Reservoir is located in dry gulch, flood water flows down gulch bed only

during freshets and carries melting snow water only for probably a week during the year. At other times freshet water flows down gulch.

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions

The reservoir is intended to store snow water and rain

freshets only. No feed canal is available.

6. The dam will be located in SW₁ NW₁, Sec. 8

(Smallest legal subdivision)

Tp. 2 S, R. 46 E, W. M. It will be eight feet in height,
(No. N. or S.) (No. E. or W.)

* A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

having a length on top of 100 feet; length on bottom about 80 feet; width on top 8 feet slope of front or water side 1 ft. (Feet horizontal to 1 vertical) slope on back 1 ft. (Feet horizontal to 1 vertical); height of dam above water line when full 5 feet.

7. The construction of dam, the material of which it is to be built, and method of protection from waves are as follows: Dam built of earth across gully, between rock outcrop on one side and slope of hill on the other side. Entirely of earth with rock mixed. There is a freeboard of about five feet above estimated water line when reservoir is full.

8. The location of wasteway with dimensions are as follows: A spillway of lumber eight feet wide, three feet deep and 32 feet long is built in one end of the dam to carry away excess water during freshet if the dam should be full when freshet occurs.

9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: The spillway is located at one end of the dam and is 8 feet wide, 3 feet deep and about 32 feet long. The water escapes through the spillway through a ditch to the gulch bed below the dam.

10. The area submerged by the proposed reservoir, when full, will be 4 acres, with a maximum depth of water of eight feet; and approximate mean depth of water four feet.

11. The estimated cost of the proposed work is \$ 500.00

12. Construction work will begin on or before work was begun September 1934.

13. Construction work will be completed on or before Is complete

Duplicate maps of the proposed reservoir and storage works, prepared in accordance with the rules of the State Water Board, accompany this application.
