

Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

I, Pacific Plywood Corporation, of Willamina, County of Yamhill, State of Oregon, do hereby make application for a permit to construct the following described reservoir and to store the unappropriated waters of the State of Oregon, subject to existing rights.

If the applicant is a corporation, give date and place of incorporation March 9, 1939, Willamina, Oregon

1. The name of the proposed reservoir is Log Pond

2. The name of the stream from which the reservoir is to be filled and the appropriation made is South Fork Yamhill River (the water which is to be appropriated under Application No. 17825 for maintenance of log pond), tributary of Willamette River

3. The amount of water to be stored is about 32 acre-feet acre feet.

4. The use to be made of the impounded water is log storage (Irrigation, power, domestic supply, etc.)

5. The location of the proposed reservoir will be in Sec. South Half Northwest Quarter, Section 6, Township 6 South, Range 6 West, W.M.

(a) State whether situated in channel of running stream and give character of material at outlet Pond is situated approximately 100 feet from the bank of the river and the outlet is a 12-inch corrugated iron pipe extending to river bank

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions Pond will be filled by a pipe line carrying cooling water from the power house.

6. The dike will be located in West half, Sec. 6, Tp. 6 S, R. 6 W, W. M. It will be 5 - 8 feet in height.

* A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

having a length on top of 2041 feet; length on bottom 2041 feet; width on top 10 feet slope of front or water side 2:1 (Feet horizontal to 1 vertical)
 slope on back 1 1/2:1 (Feet horizontal to 1 vertical); height of dam above water line when full 2 feet.

7. The construction of dam, the material of which it is to be built, and method of protection from waves are as follows: Top soil under dike was excavated to depth of one foot and back-filled with heavy clay soil built up in horizontal layers, six inches thick and thoroughly compacted with D-8 Caterpillar tractor.

8. The location of wasteway with dimensions are as follows: Intake: 10-inch steel pipe line over top of dike. (State whether over or around the dam)

Outlet: 12-inch steel pipe 24 inches below floor of dike with two concrete cut-off walls.

9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: _____ (State whether through or around the proposed dam)

10. The area submerged by the proposed reservoir, when full, will be 8 acres, with a maximum depth of water of 7 feet; and approximate mean depth of water 4 feet.

11. The estimated cost of the proposed work is \$ 5,200.00

12. Construction work will begin on or before _____

13. Construction work will be completed on or before _____

Duplicate maps of the proposed reservoir and storage works, prepared in accordance with the rules of the State Water Board, accompany this application.
