* Reservoir Permit No. R-790

ASSIGNED PERMIT NO. 3 331

Application for a Permit to Construct a Reservoir and to Store for Beneficial Use the Unappropriated Waters of the State of Oregon

I, Godfrey V. Copson,
(Name of applicant)
of Corvallis, County of Benton,
(Post office)

State of Oregon, do hereby make application for a permit to construct the following described reservoir and to store the unappropriated waters of the State of Oregon, subject to existing rights.

If the applicant is a corporation, give date and place of incorporation

1. The name of the proposed reservoir is Not named small pond

2. The name of the stream from which the reservoir is to be filled and the appropriation made is Dixon Creek
tributary of Willamette River

3. The amount of water to be stored is 100,000 cu. ft. or 2.32 acre feet.

4. The use to be made of the impounded water is Irrigation
(Irrigation, power, domestic supply, etc.)

5. The location of the proposed reservoir will be in Sec. 27 Township 11 S. Range 5 W. W. M.
(Give sections or townships to be submerged)

Submerged area entirely on my small farm

(a) State whether situated in channel of running stream and give character of material at outlet
Channel of running stream & dry slough

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions

6. The dam will be located in N. W. 4 of N. E. 4, Sec. 27,
(Smallest legal subdivision)
Tp. 11 S., R. 5 W. W. M., W. M. It will be six feet in height,
(No. N. or S.) (No. E. or W.)

* A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

having a length on top of 40 ft. feet; length on bottom 6 feet; width on top 2 feet slope of front or water side 4-6 (Feet horizontal to 1 vertical) slope on back 8-6; height of dam above water line when full 1 1/2 feet.

7. The construction of dam, the material of which it is to be built, and method of protection from waves are as follows: concrete with steel reinforcement dirt banks two feet higher than dam banks all concrete near dam. Gate in dam taken out in fall--also spillway 2' at bottom 3' at top.

8. The location of wasteway with dimensions are as follows: around dam 2' at bottom 3' at top. Water can also run over dam one foot without damage to dam. (State whether over or around the dam)

9. The location of outlet from the proposed reservoir, with character of construction and dimensions, are as follows: over gate in dam plus leaks in dam plus spillway around dam (State whether through or around the proposed dam)

10. The area submerged by the proposed reservoir, when full, will be 1 1/2 acres, with a maximum depth of water of 5 feet; and approximate mean depth of water 3 1/2 feet.

11. The estimated cost of the proposed work is \$ 300 00

12. Construction work will begin on or before at once

13. Construction work will be completed on or before June 15, 1944

~~Duplicate~~ maps of the proposed reservoir and storage works, prepared in accordance with the rules of the Engineer

State ~~Water Board~~, accompany this application. Also see Rules and Regulations of State Engineer governing the preparation and filing of plans and specifications of dams and the approval thereof. (Sgd) G. V. COPSON (GODFREY V. COPSON) (Name of applicant)

Signed in the presence of us as witnesses:

(1) _____, _____ (Name) (Address of witness)

(2) _____, _____ (Name) (Address of witness)

Remarks: This is a small dam impounding water on my own farm, storing water that would be wasted otherwise from a creek that flows freely up until about July 1st then very meager until it almost stops in August, picks up again Sept. 1st. I will release as much water as the creek flows during the dry time even though I have a water right on the creek. Storage is necessary for about six weeks in summer.
