Remarks: The federal Government in constructing the Owyhee Project and by
using the Gravel for the Dam, have created a huge hole, wherein water has collected,
and this place ajoins my Farm, and by making this ditch, the water can be used on my
land to irrigate 40 acres, as my land lays lower than the water hole, the water
gathers by seepage from Owyhee Ditch and natural sources, and if allowed to collect,
it will overflow and do damage to the roads nearby. No dam or any other works is
necessary, other than the ditch to get the water to my land.
