Remarks: Foster Creek and Bishop Creek are two separate creeks. Sam Foster  
taps the main fork of Bishop Creek, hence I do not want to take water from him,  
as these creeks go almost dry during summer months. I did not see where to put the  
lengths of various pipe used they are as follows: 200' 2" pipe: 350 - 1 1/2" pipe:  
2000' - 1" pipe: 800' - 1/2" pipe. This includes part of the side pipes tapping  
main line. Foster Creek does not fill the pipe now in use during summer season,  
hence application for Fork of Bishop Creek. At the point I wish to take water from  
Bishop Creek Fork is where it comes out of the ground at the head.
