Remarks: For cleaning the creek channel and beautifying its banks and
to build a dam for a fish pond which will give ingress and egress for migratory
fish. It will provide dead water storage in the creek channel of about 1000
feet in length, 30 feet in width and 4 feet in depth.

This dam is located at a natural fall in the creek. The depth of
water behind the dam is made possible by cleaning and deepening the channel. The
water surface will be maintained at about the same point it was before the cleaning
of the channel took place.
