Remarks: This water is being filed on at this time to assure its avail-
ibility for the rapidly increasing population of the community of Glasgow. This
community is partially served at present by a small co-operative system held in
the name of the applicant above, and as additional families wish to connect on
from time to time, the present system is too small to serve them, and additional
water will be needed. This community has tripled in population during the last
two years, following completion of the Coos Bay Highway bridge, and additional
growth seems very probable.
