Remarks: Mossy Spring supplies water to two hydraulic rams which furnish water to three farm houses. The Town of Dundee in May, 1923, filed on the waste water from the rams. The Town is now asking for a permit to use the overflow at the spring and to pipe it to their main 282 feet distant in three inch pipe. Later; We find that C. L. Conover has filed on the overflow at the spring. The Town wishes to construct a catch basin below the one supplying the rams thereby catching about 3 gallons of water a minute. Mr. Conover agrees to let the Town have the overflow from the ram catch basin when he is not irrigating.
