Remarks: We ask for a full inch to the acre, for this reason, because when there is any water there is an abundance and when the water is short there is practically none. For this reason the farmer must fill the ground with water in the early spring to run him all summer. It is absolutely necessary to get the full inch to the acre in carrying the water so far. The applicant asks you to consider his application for a full inch. We are asking for a long time to complete this appropriation for this reason. The applicant has a great amount of land besides the land mentioned in this application that he is clearing and getting ready for cultivation. This land is very hard to clear and must also be leveled up and for these reasons, it will hurry the applicant to get the work done even though he is allowed the time asked to complete it in.
