Remarks: (Continued from Item 8)

..... thence West parallel with section line, 12 chs, 15 and 22; thence East along section line 12 chains; thence North 1.82 chains; thence South 1.82 chains to point of beginning, containing 2.18 acres, more or less.

The recorded U. S. Land Patent to Victor Trevitt, is described as follows:

"Beginning at a point, which is 6.97 chains South and 10.80 chains East of the corner to Sections 14, 15, 22 and 23, in Township 1 North, Range 13 East of the Willamette Meridian. Running thence North 26.5 chains; thence East 11 chains; thence North 20 chains; thence West 35.42 chains; thence South 30.21 chains; thence West 15 chains; thence South 16 chains; thence East 39.50 chains to place of beginning."

The water applied for, is the excess or flood water of Threemile Creek. Other pumping permits from this stream, are above this point of diversion. On May 18, 1948, there was approximately 0.9 sec. ft. of water, flowing past this proposed point of diversion. Water can be applied to cherry orchard, at almost any time of the year that the water is available.

The corner of Sections 14, 15, 22 and 23, T. 1 N., R. 13 E.W.M., is marked by a 3/4" iron pipe. From this corner, we ran a survey, South 6.97 chains (460 feet) and set a 2" iron pipe at the intersection of the section line between Sections 22 and 23, with the south boundary of the Victor Trevitt Donation Land Claim. Thence we ran West, and at 1320 feet, set another iron pipe, 2" in diameter. This latter may then be described as being South 460 feet and West 1320 feet from the corner to Sections 14, 15, 22 and 23, T. 1 N., R. 13 E.W.M.

The pipe line, to be used, is movable, and will be transferred from one location to another, as needed to apply the water to the land.
