Remarks: The storage tanks and water system are all in at Monroe and this 2
inch pipe line is to connect in, and supply more water.

It seems that the descriptions above are not what was intended in that space but it
gives the location of the spring lot and pipe line also a roadway to the spring
from the county road.
~~A smaller spring was shown on the plat about 300 feet north of the spring lot~~
hereindescribed was intended to be taken in but Mr. Buxbaum objected.
