Remarks:

I have purchased the pump unit and pipe quoted and shown on the map for the initial irrigation program and intend to move the 3" laterals serving 25 sprinklers of 8 G.P.M. capacity as required to serve the fields shown. If irrigation proves satisfactory I plan to purchase a portable pumping unit to be located within the "LIMITS OF DIVERSION" shown on the map and irrigate all the fields shown.

I understand that the ordinary allowance is 0.0125 cubic feet per second per acre which totals 0.959 cu.ft. per sec. for the total of 76.7 Acres in Fields A-E inclusive.

The proposed dams are located at points which will provide the low pool level necessary for pumping, and will not cause a serious obstruction during high water.
