The applicants do not propose to alter or materially change the present system of applying water to their lands through the existing channels and ditches. At the present time, the waters of Silver Creek flows, during the spring runoff period (March to May incl), through the channels and ditches and floods over the lands listed above. The applicants do not contemplate the storage of all water under existing rights; Water to be stored in the Silver Creek Dam will be released and permitted to flow through the channels and ditches now in existence.
