Remarks: This application is made for a permit to irrigate 47 acres but it is not intended to irrigate in excess of 25 acres in any irrigation season. Under the practice of rotation in cropping, the entire 47 acres will ultimately be irrigated. It is requested that the quantity of water allowed be that required to irrigate 25 acres but made appurtenant to the entire 47 acres. Should it develop that the available supply is not sufficient to irrigate 25 acres, then it is desired that the available supply be made appurtenant to the entire 47 acres.
