*Jack De Jong*  
(Signature of applicant)

Remarks: Using the principle of crop rotation, only about one-fourth or one-third of the area shown on the map will be irrigated in any one year. It is desired to have the right to appropriate water for irrigation of the area in production in any particular year.

This application is made for a permit to irrigate 162.5 acres but it is not intended to irrigate in excess of 25 acres in any irrigation season.

Under the practice of rotation in cropping, the entire 162.5 acres will ultimately be irrigated.

It is requested that the quantity of water allowed to that required to irrigate 25 acres but made appurtenant to the entire 162.5 acres.

Should it develop that the available supply is not sufficient to irrigate 25 acres, then it is desired that the available supply be made appurtenant to the entire 162.5 acres.

PERMIT

STATE OF OREGON,

County of Marion.

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.313 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from an unnamed stream and reservoir to be constructed under Application No. R-28434, Permit No. R-1538

The use to which this water is to be applied is irrigation of not to exceed 25 acres in any one year

If for irrigation, this appropriation shall be limited to 1/80 of one cubic foot per second or its equivalent for each acre irrigated from direct flow and shall be further limited to a diversion of not to exceed 2 1/2 acre feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage from reservoir to be constructed under Permit No. R-1538

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is May 20, 1953

Actual construction work shall begin on or before December 24, 1954 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1955

Complete application of the water to the proposed use shall be made on or before October 1, 1956
