By [Signature] Pres.

Remarks: This Application is for a pond in which to store saw logs during the summer months, so that the "Coquille Plywood Inc., may operate their Plywood Mill ~~continuously~~ continuously throughout the entire year, and it is necessary that they have a very large log pond for storage of logs, as the trucking roads from the woods, are impassible during the \_\_\_\_\_ months of the year. In spite of the 3 months strike, the Co. has accumulated approximately 17,000,000 board feet of logs in these two ponds, and is making every effort to increase this amount to 25,000,000 to pass them through the winter months.

EXPLANATION.

In order to distinguish the description of Pond No. 2, which is mentioned in the foregoing, from Pond No. 1, which was constructed in 1951, I have prepared one map showing both ponds, but the map which is attached refers to Pond No. 2, which is connected with Pond No. 1, and the connection like between them; Therefore the water level in both ponds is the same. Pond No. 1 was constructed in 1951, and No. 2 in 1953, and this application applies to No. 2 only. This method proved to be the best method for the solution of the matter.

I hope this will meet with your approval
