Re - Certificate No 2394

The lands described as supplemental in this application are covered under Certificate of Water Right No. 2394 and it is the intent as soon as possible to make a change in point of diversion from the point described in the certificate to the point described in the present application. The statutory requirements and time taken to perfect the change in point of diversion would preclude use of this water for the present season. It is therefore desired that this application be approved to legalize that use. As soon as the change in point of diversion can be obtained, the applicant will authorize the cancellation of those lands described as supplemental from the permit.

*Above Remarks approved by me as representative
of Applicant*
