

APPLICATION FOR PERMIT

To appropriate the Public Waters of the State of Oregon

I, Jack Farrell (Name of applicant)

of Foster, Oregon (Mailing address)

State of Oregon, do hereby make application for a permit to appropriate the following described public waters of the State of Oregon. SUBJECT TO EXISTING RIGHTS

If the applicant is a corporation, give date and place of incorporation

1. The source of the proposed appropriation is Whitcomb Creek, a tributary of Middle Fork of the South Santiam River

2. The amount of water which the applicant intends to apply to beneficial use is two cubic feet per second.

3. The use to which the water is to be applied is Fish pond and log pond and irrigation.

4. The point of diversion is located 2549 ft. S 83 and 5' from the quarter corner of Section 36, T 12 S, R 2E, ...

(If preferable, give distance and bearing to section corner)
(If there is more than one point of diversion, each must be described. Use separate sheet if necessary)
being within the NW 1/4 of the SE 1/4 of Sec. 36 T. 12 S R. 2E, W. M., in the county of Linn
5. The main ditch & pipe to be 337 feet in length, terminating in the NW 1/4 of the SE 1/4 of Sec. 36 T. 12 S R. 2 E, W. M., the proposed location being shown throughout on the accompanying map.

DESCRIPTION OF WORKS

Diversion Works—

6. (a) Height of dam four & 1/2 feet, length on top 78 feet, length at bottom 78 feet; material to be used and character of construction concrete

(b) Description of headgate a sliding gate made from two inch boards one opening, 48 inches by 20 inches.

(c) If water is to be pumped give general description not applicable

\*A different form of application is provided where storage works are contemplated
\*\*Application for permits to appropriate water for the generation of electricity, with the exception of those applications that are made to the Hydroelectric Commission. Either of the above forms may be secured, without cost, together with instructions by addressing the State Engineer, Salem, Oregon.

23670

Canal System or Pipe Line—

7. (a) Give dimensions at each point of canal where materially changed in size, stating width at headgate. At headgate: width on top (at water line) four feet, width on bottom four feet; depth of water 20 inches. ~~xxxx~~ grade two feet fall per one thousand feet.

(b) At 337 feet ~~xxxx~~ from headgate: width on top (at water line) eleven feet; width on bottom eight feet; depth of water two feet. grade two feet fall per one thousand feet.

(c) Length of pipe, 37 ft.; size at intake 48 X 20 in.; size at 37 ft. from intake 42 X 30 in.; size at place of use 42 X 30 in.; difference in elevation between intake and place of use, six inches ft. Is grade uniform? yes Estimated capacity two sec. ft. This concrete pipe runs from the headgate to the open ditch

8. Location of ~~pipe to be irrigated~~ or place of use

Township	Range	Section	Forty-acre Tract
----------	-------	---------	------------------

Beginning at a 3/4" iron pipe on the North line of and S 89 56' W 19.828 chains from the N E corner of the S E 1/4 of Section 36 in T 12 S R 2 E of the W.M. in Linn County, Oregon; and running thence S 0 13' E 28.677 chains to a point in the center of the South Santiam river (from which point a 3/4" iron pipe bears N 0 13' W 2.745 chains) thence S 37 12 1/2' W along the center of said river 9.435 chains; thence N 35 50' E leaving said river and following the center of Whitcomb Creek together a distance of 2:960 chains to a point under a dam in the County Bridge over said Creek; thence along the center of said Creek upstreams as follows:

N 37 25' W 3.130 chains; thence N 24 25' W 3.333 chains; thence N 44 21' W 1.668 chains; thence N 24 37' W 3.032 chains; thence N 30 07' 3.686 chans; thence N 17 56' E 3.963 chains; thence N 19 44' W 5.530 chains; thence N 10 02' W 6.388 chains; thence N 2 50' W 3.450 to the north line of the S E 1/4 of said Section 36 (from which last said point a 1" iron rod bears S 89 56' W 1.428 chains) thence N 89 56' E along said line 19.051 chains to the place of beginning, containing 50.435 acres, more or less.

12 S	2E, 7M	36	NW 1/4 of the SE 1/4
12 S	2E, 7M	36	SW 1/4 of SE 1/4

(If more space required, attach separate sheet)

(a) Character of soil loam

(b) Kind of crops raised ~~potatoes, corn, etc.~~

Power or Mining Purposes—

9. (a) Total amount of power to be developed none

(b) Quantity of water to be used for power none

(c) Total fall to be utilized --- feet.

(d) The nature of the works by means of which the power is to be developed

000-

(e) Such works to be located in

TP. No. N. of S. Range No. E. of W. W. M.

(f) Is water to be returned to any stream? yes

(g) If so, name stream and locate point of return Whitcomb Creek, 510 ft. below

dam & seepage 800' below dam Sec. 36 Tp. 12 S R. 2 E 7 M.

(h) The use to which power is to be applied is no power

(i) The nature of the mines to be served none

Municipal or Domestic Supply—

10. (a) To supply the city of ~~XXXX~~ none

County, having a present population of  
(Name of) and an estimated population of in 19

(b) If for domestic use state number of families to be supplied none

(Answer questions 11, 12, 13, and 14 in all cases)

11. Estimated cost of proposed works, \$ 3000.00

12. Construction work will begin on or before August 1, 1953

13. Construction work will be completed on or before The work has been completed

14. The water will be completely applied to the proposed use on or before Aug. 1 1953

Jack P. Farwell  
(Signature of applicant)

Remarks: Since I didn't have a definite plan, I was advised by a State Game officer to complete the works then apply which I have done. The water used so far has not been detrimental to anyone because my place runs to the outlet of Whitcomb Creek.

The water will be utilized in this manner. The water is to be taken from Whitcomb Creek by a concrete dam and pipe into an open ditch where small rainbow trout will be raised. This requires a large volume of water for fast growth and the prevention of disease and the efficient utilization of food. Part of the water is returned to Whitcomb Creek and part flows into the log pond to enable the mill located there to operate. From the log pond, it flows through a small ditch to the fish pond where the large fish taken from the rearing ditch are kept. To provide fresh running water for the large fish, an outlet returns part of the water to Whitcomb Creek at this point and part of the water will be used to irrigate some acres of land which has just been cleared and is put into permanent pasture for raising stock. At the end of the pasture is a horse garden which will also be irrigated.

Thirty thousand rainbow trout will be raised each year and the mill runs when so permitted by weather and log supply.

The land to be irrigated was cleared after the map was made and I have shaded in pencil that area also indicated which pond was which.

The fish raised in the rearing ditch and those kept in the pond will be sold by having the public fish for them in each of the ditches. The excess will be sold to fish markets and like places. It is a profitable enterprise.

Fish Cultivist recommend that a large volume of water be used when raising rainbow trout for commercial purposes because not only will the fish remain free of disease but their growth will be greater for the amount of food which is fed to them. This is due to the fact that they obtain a greater amount of oxygen.

The necessity for fresh running water to the fish pond will also keep the log pond clean and prevent it from being a breeding place for

Department of Fish and Game  
Salem, Oregon

PERMIT

STATE OF OREGON, }  
County of Marion, }

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 2.0 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from Whitcomb Creek and its reservoirs to be constructed under Application No. R-22273, Permit No. 194.

The use to which this water is to be applied is log pond, fish pond and irrigation, being 1.962 c.f.s. for log pond and fish culture and 0.038 c.f.s. for irrigation.

If for irrigation, this appropriation shall be limited to 1/60th of one cubic foot per second or its equivalent for each acre irrigated and shall be from direct flow diversion of not to exceed 2 1/2 feet per acre for each acre irrigated during the irrigation season of each year from direct flow and shall be from the reservoir to be constructed under Permit No. R-

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is August 3, 1914.

Actual construction work shall begin on or before November 21, 1914 and shall thereafter be prosecuted with reasonable diligence and be completed on or before Oct 21, 1915.

Complete application of the water to the proposed use shall be made on or before Oct 21, 1915.

WITNESS my hand this 21st day of November, 1914.
