Remarks: The pond, which is referred to above, is entirely located on land owned by the Applicant. It is proposed to install a pump at the edge of the pond and carry water through a 4 in. pipeline, at the rate of 200 gal. per min. to be used in a sprinkling system for the irrigation of about 10 acres of alfalfa and 10 acres of pasture. Said pond, as above indicated, has no inlet or outlet and is fed by a spring presumed to be located at the bottom thereof. No question is raised on account of game fish or the right of the Applicant to cross the land of other individuals for the reason that the pond is located on her property. No irrigation system has ever been used in connection with said pond, and the water in said pond appears to remain at the same level throughout the year, except that it rises several feet during the rainy season.
