City Supervisor, City of Dallas, Oregon

Remarks: The water is to be diverted by existing facilities in conjunction with a proposed reservoir located about five miles up-stream from the point of diversion. Since the existing pumping station at the point of diversion and the existing transmission line are adequate for present demands, no initial construction under this permit is contemplated. Additional pumps will be installed in the pumping station and an additional transmission line, or a larger transmission line, will be constructed when they become necessary to provide for future demands.
