Remarks: At the State Engineer - I do not know
the capacity of the pump used, except that
it does put out water enough to drive 12 -
30 "air lift" heads. This type of irrigation
requires constant changing of pipe lines to new
locations or area.

I would like for the permit or water right
to give me water to irrigate 17.5 acre or
of land as needed - from early spring until
late fall.

I have a few question # 2 + 'C' - "7
would you please answer these by intermixing
the correct amount in cubic second just
