Remarks: The object of this application is to be able to diversify our crops under irrigation at present the permit stands for only 30 acres as shown on map-9A and 21 A - this has been under irrigation and mostly beans for several years. We do not intend to use only part of this each year as irrigated soil would like to use all the farm land west of lake under irrigation and diversify same as necessary.

I did not describe the land we wish to get additional permission to irrigate but it is shown on map with lines drawn thru approximately 52 acres if you can fill in description for me as desired by our application I will be obliged.
