STATE ENGINEER
SALEM, OREGON

APPLICATION FOR PERMIT

To appropriate the Public Waters of the State of Oregon

I, Rich E. Adams
(Name of applicant)
of 4090 River Road N.E., Salem, Oregon
(Mailing address)

State of Oregon, do hereby make application for a permit to appropriate the following described public waters of the State of Oregon, **SUBJECT TO EXISTING RIGHTS:**

If the applicant is a corporation, give date and place of incorporation

1. The source of the proposed appropriation is a series of springs which form the head for a branch to Salt Creek, some 700 feet long,
(Name of stream)
which said Salt Creek is _____, a tributary of Yamhill River.

2. The amount of water which the applicant intends to apply to beneficial use is 3/80ths of a cubic foot per second. (27 gallon per minute)
(If water is to be used from more than one source, give quantity from each)

3. The use to which the water is to be applied is domestic supplies, home use and farm lot, namely, .01 cubic foot of water per second for domestic use, .01 cubic foot of water per second for stock water, and .04 cubic foot of water per second for the irrigation of three acres.

4. The point of diversion is located 500 ft. north and 140 ft. west from the 1/4 corner of Section line between Sections 10 and 11, (identified by a 1/4 corner stone)
(Section or subdivision)

Township 7, Range 6 West, Willamette Meridian in Polk County, Oregon, and is located on land presently owned by Longview Fibre Company from which a permit to take water has been tentatively granted to applicant upon approval of permit.

(If preferable, give distance and bearing to section corner)

(If there is more than one point of diversion, each must be described. Use separate sheet if necessary)

being within the SE 1/4 of the NE 1/4 of Sec. 10, Tp. 7
(Give smallest legal subdivision) (N. or S.)

R. 6 N., W. M., in the county of Polk
(N. or W.)

5. The _____ pipe line _____ to be APPROX 700 feet
(Chain ditch, canal or pipe line) (Ditch or feet)
in length, terminating in the SW 1/4 of the NW 1/4 of Sec. 11, Tp. 7
(Smallest legal subdivision) (N. or S.)

R. 6 N., W. M., the proposed location being shown throughout on the accompanying map.
(N. or W.)

DESCRIPTION OF WORKS

Diversion Works—

6. (a) Height of dam _____ feet, length on top _____ feet, length at bottom _____ feet; material to be used and character of construction _____
(Loose rock, concrete, masonry)

rock and brush, timber crib, etc., waterway over or around dam)

The headwaters of this creek (Item 1 above) form from a series of springs about 100 feet in length along a delta in a hillside, and my plan is to develop four or five of these main springs which come out of the ground and set over them cement tile, from which will run iron pipe by gravity flow to a central cement tile that will be used to channel the water into pipe line to proposed residence site and land below. 12" to 16" tile for caps

(c) If water is to be pumped give general description
and possibly 16" tile or 24" cement box for head tank to pipe line and this water would flow by gravity and not require any pumping action.
(Size and type of engine or motor to be used, total head water is to be lifted, etc.)

*A different form of application is provided where storage works are contemplated.
**Application for permits to appropriate water for the generation of electricity, with the exception of municipalities, must be made to the Hydroelectric Commission. Either of the above forms may be secured, without cost, together with instructions by addressing the State Engineer, Salem, Oregon.

Canal System or Pipe Line

7. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) ... feet; width on bottom ... feet; depth of water ... feet; grade ... feet fall per one thousand feet.

(b) At ... miles from headgate: width on top (at water line) ... feet; width on bottom ... feet; depth of water ... feet; grade ... feet fall per one thousand feet.

(c) Length of pipe, 700 ft.; size at intake, 1 1/2" in.; size at ... ft. from intake 1" in.; size at place of use 3/4" in.; difference in elevation between intake and place of use, 100 ft. Is grade uniform? Quite so. Estimated capacity, 27 gallon per minute.

8. Location of area to be irrigated, or place of use approximate center of 40 acre tract described as: 250 ft. x 530 ft. plot bordered on west by county road and east by ...

Table with 5 columns: Township North or South, E. or W. of Willamette Meridian, Section, Partly-own Tract, Number Acres To Be Irrigated. Row 1: 7 S, 6 W, 11, SW 1/4 NW 1/4, House & 3 acre lot, stock. Below table is a legal description of the land and a note about the description.

(If more space required, attach separate sheet)

(a) Character of soil Clay with some gravel

(b) Kind of crops raised Pasture and Family orchard and garden plot

Power or Mining Purposes—

9. (a) Total amount of power to be developed ... theoretical horsepower.

(b) Quantity of water to be used for power ... sec. ft.

(c) Total fall to be utilized ... feet.

(d) The nature of the works by means of which the power is to be developed

(e) Such works to be located in ... of Sec.

Tp. ... R. ... W. M.

(f) Is water to be returned to any stream? ...

(g) If so, name stream and locate point of return

(h) The use to which power is to be applied is

(i) The nature of the mines to be served

To supply the city of _____
County, having a present population of _____
and an estimated population of _____

(3) \$ for domestic use with number of fixtures to be supplied 12

- 11. Estimated cost of proposed works, \$ 500.00
- 12. Construction work will begin on or before September, 1964
- 13. Construction work will be completed on or before April, 1965
- 14. The water will be completely applied to the proposed use on or before April, 1965

[Handwritten Signature]

Remarks: I have poured the foundation for a 30x30 dwelling including a slab floor and have laid water lines and rough plumbing in cement and have dimension material for framing on location, however due to unavoidable circumstances in my work, have not been able to complete this structure. Expect to start building next Spring and would like to complete for use in Fall of 1964. Some of the land clearing and fencing for pasture will then follow.

STATE OF OREGON, }
County of Marion, }

This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for completion
completion

In order to retain its priority, this application must be returned to the State Engineer, with corrections on or before December 30, 1963
January 14, 1964

PERMIT

STATE OF OREGON,
County of Marion,

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.05 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from a series of springs

The use to which this water is to be applied is domestic use of one family, irrigation and stock; being 0.005 c.f.s. for domestic, 0.04 c.f.s. for irrigation and 0.005 c.f.s. for stock

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2 1/2 acre feet per acre for each acre irrigated during the irrigation season of each year,

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is October 18, 1963

Actual construction work shall begin on or before April 1, 1965 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1966.

Complete application of the water to the proposed use shall be made on or before October 1, 1967.

WITNESS my hand this 1st day of April, 19 64
