Remarks: The purpose of this request for a water right is for supplemental maintenance of the pond level only. The pond is normally maintained from two existing wells on the property under permit #'s G.54c and G.661, however, some years during extended dry periods it is very difficult to maintain sufficient water depth to handle logs.

The location of the point of diversion is adjacent to W.R. 38482 on farm land presently owned by Mr. Ronald McKelvey who is aware of our request. Sufficient room for setting the pump is available as well as sufficient electrical current to operate. Periods of our use of water would be at times when W.R. 38482 was not being used, such as, if farm irrigation was going on during the day our use would be during the night.
