(Signature of applicant)

Remarks: The pipe and pump are now being used but not at all the indicated diversions. Supplementary point #2 and #7 are natural ponds caused by flooding action of Floras Creek. They have not been actually pumped to determine their potential or capacity. Sections of the West portion of Sec. 4 and East portion of Sec. 5 are still being cleared of stumps but are under grass. The Northwest portion is small but can be drained by siking. There are scattered areas of brush throughout the Sections.
