4. The points of Diversion are located:

- a. In Lake Creek 2310' N. and 1808' W. from the S.E. corner of Section 4, being within the NW4 of SE4 of Section 4, T.9S., R.23 E., W.M. in the county of Wheeler.
- b. In Lake Creek 2750' N. and 2040' W. from the S.E. corner of Section 4, being within the SW4 of NE4 of Section 4, T.9 S., R.23 E., W.M. in the county of Wheeler.
- c. In John Day River 1342' S. and 208' W. from the N.E. corner of section 9, being within the SE_4^1 of ME_4^1 of Section 9, T.9 S., R.23 E., W.M. in the county of Wheeler.
 - Booster pump #1 is located 1142 N. and 138 E. from the SW4 of SW4 of Section 3, 7.9S., R.23 E., W.M. in the county of Wheeler, the proposed location being shown throughout on the accompanying map.
 - 2. Booster pump #2 is located 1780' N. and 1358' W. from the S.E. corner of Section 34, being within the NW¹/₄ of SE¹/₄ of Section 34, T.8S., R.23 E., W.M. in the county of Wheeler, the oroposed location being shown throughout on the accompanying map.

5. Main Ditches and Buried Pipelines:

- a. The Main ditch from Diversion Dam #1 is to be 2150 in length, terminating in the NE_4^1 of SE_4^1 of Section 4, T.98., R.23 E., W.M., the proposed location being shown throughout on the accompanying map.
- b. The Main ditch from Diversion Dam #2 is to be 970° in length, terminating in the NW4 of SE4 of Section 4, T.98., R.23 E., W.M., the proposed location being shown throughout on the accompanying map.
- c. The Pipeline is to be 7310' in length, terminating in the NW1 of SE1 of Section 34, T.8 S., R.23 E., W.M., the proposed location being shown throughout on the accompanying map.

6. Diversion Works:

a. Height of Diversion Dam #1 is 3 feet, length on too - 30 feet, length at bottom - 15 feet; Material to be used - Mixed gravel and soil, Character of Construction - Rock and Soil embankment, Wasteway around dam.

Height of Diversion Dam #2 is 4 feet, length on top - 20 feet, length at bottom - 15 feet; Material to be used - Mixed gravel and Soil, Character of Construction - Rock and Soil embankment, Wasteway around dam.

30159

b. Description of headgates: One headgate will be used at each Diversion Dam for a total of 2 headgates. Each headgate will be constructed from treated timber: Size of each headgate opening will be 2 feet wide and 1½ feet deep. Board stops will be used in headgates.

c. Pumping Information:

	Primary Pumping Plant	Booster Pump #1	Booster Pump #2
Number of Pumps	. 1	1	1
Size and Rating	3W30-2 Close	W20-2 Close	Close Coupled
5120 4	Coupled Unit	Coupled Unit	if Electric
Туре	Centrifugal	Centrifugal	Centrifugal
Capacity	Total Maximum g	om for System	- 525
Suction Lift	10 feet	booster	booster
Discharge Lift	Total lift for	all Pumps - 2 ⁹	0 feet
Moveability	Stationary	Stationary	Portable
Motor (Size & Type)	30 hp - Elec.	20 hp - Elec.	5 ho - Elec.
-Jpo/			or comparable
	l .		in gas.

- d. Method of Irrigation and Supporting Data:
 - 1. Method of Irrigation Sprinkler.
 - 2. Number of Sprinklers 70
 - 3. Size of Sprinklers 7.5 gpm heads

7. Canal System or Pipe Line:

- a. Both Main Ditches (Irrigation) will be of uniform construction. At headgate: Width on top (at water line) 1.7 feet; Width on bottom 0.7 feet; depth of water 0.5 feet; grade 5 feet fall per one thousand feet.
- b. Both Main Ditches (Irrigation) will be unif ormly constructed as described above.
- c. The Pipe lines used in this Irrigation System will be as follows: (Total length - 7310')
 - The Primary Pump located on the john Day River will discharge into 2630° of 8° 0.D. buried welded steel mainline: This pipe will be of welded steel construction, 14 ga., dipped in mineral asphalt on the outside only and wrapped with Kraft paper.
 - 2. At termination point of 8" steel pipe Booster Pump #1 will be installed and it will discharge into 3080' of 6" 0.P. buried welded steel mainline, 800' of 6" Aluminum tubing, and 800' of h" Aluminum tubing. All Aluminum tubing will be portable. The buried 6" 0.P. welded steel mainline will be of welded steel construction, 14 ga., dipped in mineral asphalt on the outside only and wrapped with kraft paper.

Difference in elevation between intake of 8" buried mainline and termination of 4" portable mainline is 100 feet.

Grade of mainline is relatively uniform.

Estimated capacity of Irrigation System at Selected Points:

1.16 sec. ft. through 2630' of 8" 0.D.
0.78 sec. ft. through 2080' of 6" 0.D.
0.53 sec. ft. through 1800' of 6" 0.D.
0.31 sec. ft. through 800' of 4" 0.D.

Booster Pump #2 will be installed at termination of h" 0.D. portable Aluminum mainline. This pump will supply water through portable mainline and laterals to the higher elevation field - 6.5 acres of which lies in the NE3 of SE4 of Section 3h and 1.0 acres of which lies in the NW4 of SW4 of Section 35, T.8 S., R.23 E., W.M., in the county of Wheeler. Pressure regulators to be used on individual sprinklers in this field
