Remarks: Item 1, page 1 (source of water) The ponds on my farm are formed by water dumped by the Stanfield Irrigation District and are therefor not a tributary of any stream. The said district owns an easement to so dump the excess waters into these ponds. I have a water right from said district to irrigate 54.5 acres more or less in fields (3) and (4) which are not cross-hatched in the enclosed map.

I propose to sprinkler irrigate the entire acreage in my quarter section which is not in ponds or improvements (fields 1 to 5 as shown on the map). I have discussed this with the manager of Stanfield Irrigation District and was advised to file for a permit to use the wasted water to irrigate the additional 90 acres not covered by the district water right.

At least to begin with, all main lines and laterals will be portable and operated from the one central pumping station.
