Dated: April 12, 1965

Remarks: This application is to appropriate water from Crooked Creek to be used as a supplemental water on 473.5 acres of the Wood River water right (Application No. 34352, Permit No. 27011) and 482.2 acres of the Fort Creek water right (Application No. 34353, Permit No. 27012), as shown on the map. There is sufficient water for both of the above mentioned permits, but during the mid-summer and fall irrigation period, due to the extreme heavy use of water by water users farther north of these permits, it became necessary to install the pump system in order to obtain enough water to irrigate. The water is pumped from Crooked Creek into the Fort Creek Canal. This canal is practically flat from the pumping point to the north side of the property and it was found possible to irrigate the area as shown on the map.
