Remarks: We have over 4000 acres ready for application of water in the spring of 1966. Water will be delivered through our existing system with most of the water being pumped from the main canal. Some users wish to irrigate very early in the spring starting in January or February depending on weather conditions. Delivery will be made to individual users by the district on equal priority basis as long as water is available under the priority of this application, and carrying capacity is available in the Furnish Canal. Some land will receive water to supplement the existing right for appropriation of ground water.

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 170 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from Umatilla River

The use to which this water is to be applied is irrigation and supplemental irrigation

If for irrigation, this appropriation shall be limited to 1/40th of one cubic foot per

second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 4 1/2 acre feet per acre for each acre irrigated during the irrigation season of each year, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein. The irrigation season used herein shall include any time between January 1 and November 1 of each year that water can be put to beneficial use by irrigation, either for immediate crop growth or for forecast requirements to raise the soil moisture to field capacity in the soil profile to be utilized by plant growth in the subsequent growing season. The use of water authorized herein shall be subsequent in priority and inferior to future irrigation project developments that provide a more efficient system through storage during the winter season and later use during the period of maximum crop demand.

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is June 23, 1965

Actual construction work shall begin on or before March 4, 1967 and shall

thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1967...

Extended to Oct. 1985

Extended to Oct. 1, 1977 Extended to Oct. 1 1974
