Remarks: As the attached map shows, my property lies just east of a small creek which forms approximately the west boundary of my property. This creek is spring fed by springs in creek bed adjacent to my property. In late summer the creek is dry except for these springs.

I plan to pump from this creek at the two locations shown on attached map. The reason for the dam 6' high + 10' wide at bottom and 30' wide at top is to provide a suitable diversion point at second location
