Remarks: This pipe line is to be connected to an existing line which was part of our former well system. The well was destroyed in the 1965 flood. The pump with pressure switch was also part of that system. The estimated cost is only for the new 2" pipe necessary to bring the line down to the pump. It is a simple system with the pump connected directly to the line and comes on and off as water is used. This is a domestic supply but will also be used to irrigate about 5 acres total of lawns and gardens. ~~We also have 3 pools which were built for flood control, but which are used for domestic ducks and have fish in them. Skunk Creek is spawning grounds for fish coming up from the river and the pools are an aid to them getting upstream, therefore we want to keep them full.~~
