Remarks: The spring is apart from any running stream. There was no water on the surface when it was excavated. It is simply a well with a pipe to conduct the water to the school. The work was begun in August and finished Sept. 9, 1909. In winter, it overflows but in summer very little water is to be had. At the time of the construction work, we were ignorant of the fact that it was off of our land. After having our farm surveyed, we found that the spring was on vacant land, 10 1/3 feet from our boundary line.
