Remarks: even though the trualatin has many water rights issued at present there are few in my area. In august '67 five feet from my river bank I measured the rivers depth at 19' 4". The water is always available in my area of the river because of the 6' dam 1 3/8 miles down stream from me. I feel there is adequate water available for my small usage, and would very much like to acquire water rights for my crops.

Thankyou:

W. J. Giala
