Remarks: Montello Ave. is at the edge of a stratum of gravel, and along this street considerable water comes out from under this gravel and needs to be drained from the upper side of the street, also from some cellars. Mr. Mohr appeared before a recent meeting of the City Council at which Dr. Scobee presided as acting Mayor. The latter confirmed Mr. Mohr's statements as to the water at this point and the Council readily granted him permission to collect and use this water, as two things would be gained by so doing: The disposal of the water would be a benefit to the street and valuable use would be made of the water at the same time.
