Remarks: This water has been used at this location by the Ismest family since 1887. My father took permanent residence in the year 1937. In that year, the present intake was established. In 1971, I rebuilt water line, using the old location, to maintain proper gravity flow pressure. Water pressure is about 35# - water line falls about 80' in the 850' of length.

The amt of water (20 Gals per min) noted in Item #2 is the max. amt possible (all outlets open). Item #3 - Water use is for domestic supplies including the irrigation of gardens not to exceed one-half acre area.
