Remarks:

The water from this spring was believed by the municipal officials to have been  
appropriated in 1906 by a desert land entry of adjoining land, from whom the municipality  
purchased a relinquishment and assignment and thought it thereby obtained the right to  
the use of the waters of said springs, but subsequent investigation reveals the fact that  
the springs are not on the land on which they were believed to be, but on other lands,  
hence it is requisite that steps be taken to obtain title to the right to use the said  
waters, as without this right the municipality will have no municipal water supply.

The supply is taken from three springs, practically in a group, the greatest  
distance between any of them being about 250 feet.
