Remarks: In Reply to Letter dated October 8, 1974 from Wayne J. Overcash:

The storage pond as shown on the map was excavated from the area of the pond and
the excavated material used as the embankment containing the pond. The pond is
about 5 to 6 feet in depth when full.

A drag line machine was used to do the excavation. A Bulldozer was used in
conjunction with the drag line to place and compact the embankment (dike).

Gus Creek and Gus Creek reservoir will supplement the existing
water right related to Cedar Fork(36857). There is no intention
of abandoning the Cedar Fork water right.
