Remarks: The primary right on these land is the Cold Springs project. To my knowledge these rights have never been exercised. I give you my permission to cancel these rights. My pond will be the primary source of water.

This is the same source of water I filled on in a previous filling. It is a natural depression, source of water is sub surface drainage where the basalt rock is very near the surface all through the area. The pond can be tied to irrigation in the area. The pool level drops in the winter months and rises in the spring, when the Hermiston Irrigation District starts releasing water.
