Remarks: It will take me some time before this cattle operation is in full swing so I don't really think I'll have an irrigation problem the first year. However, the system will definitely have to be used to satisfy the grass needs of 70 full grown weevils. Right now all finances are being funneled into building a house & barn plus X-fencing. At any rate, I'd like to know that I have water rights if and when they're required.
