City Manager (Signature of applicant)

Remarks: The existing outfall sewer line has been used since 1946, to transport waste water from several local canneries and the treated waste water from the City of Milton-Freewater sanitary collection system, to the settling basins.

The water used by the canneries and the city is basically ground water from local wells.

We wish to divert additional water from the Walla Walla River, through the Milton Ditch Company facilities, then into the existing industrial sewer, transporting it 5 miles to the settling basins where it will be used to irrigate the city property.

These three 39 acre tracts already have an existing water right from Dry Creek.
