cubic feet per second. 4 c.f.s. is from the natural drain ditch and 1.5 c.f.s. is from live springs tapped in construction of sump.
(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is supplemental irrigation

6.

DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

Our actual sump, now under construction, when completed will hold 3 acre feet. There is an underground main line system to serve the entire ranch that ends at the point where the pond is. This pond, or sump, now being excavated has uncovered numerous underground springs which will also contribute to the water supply. Our entire farmland is under the Wolf Creek Reservoir and W-1 pipeline.

If for domestic use state number of families to be supplied

7. Construction work will begin on or before November 1, 1977

8. Construction work will be completed on or before June 1, 1978

9. The water will be completely applied to the proposed use on or before July 1, 1978

Application No. 56069

Permit No. 42937

Remarks: This water source is primarily from drain tile recently installed on our own property to tap underground springs supplemented by the overflow of a spring located on Harold K. Umphrey property, also waste water from lands newly put under irrigation, located above our property. All of these collect in a natural drainage ditch above our point of diversion. Our land lacks adequate water and this will be used to supplement our stored water in the Wolf Creek Reservoir.

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 5.5 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from unnamed drainage and springs in a pumping sump; being 4.0 c.f.s. from drainage, and 1.5 c.f.s. from the springs.

The use to which this water is to be applied is supplemental irrigation.

If for irrigation, this appropriation shall be limited to 1/40th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 4 acre feet per acre for each acre irrigated during the irrigation season of each year, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein,

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is June 15, 1977

Actual construction work shall begin on or before May 3, 1979 and shall

thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1980

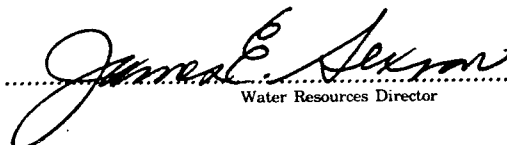

Extended to Oct. 1 1981

Extended to Oct. 1, 1982

Complete application of the water to the proposed use shall be made on or before October 1, 1981

Extended to Oct. 1, 1982
