make application for a permit to appropriate the following described waters of the State of Oregon:

make application for a permit to appropriate the following described waters of the State of Oregon:

make application for a permit to appropriate the following described waters of the State of Oregon:

1. The source of the proposed appropriation is... a series of springs situate in

China Creek creekbed, a tributary of Mill Creek

China Creek creekbed, a tributary of Mill Creek

2. The point of diversion is to be located 140 ft S. and 30 ft W.

2. The point of diversion is to be located ft. and ft.
(N. or S.) (E. or W.)

from the NE corner of NW $\frac{1}{4}$, SW $\frac{1}{4}$. (Public Land Survey Corner)

(Public Land Survey Corner)

(If there is more than one point of diversion, each must be described)

..... being within the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of
Sec. 21 Tp. 6 N. R. 38 E., W.M., in the county of Umatilla

3. Location of area to be irrigated, or place of use if other than irrigation.

4. The amount of water which the applicant intends to apply to beneficial use is 0.01
cubic feet per second.....from a series of springs in the China Creek creekbed.....
(If water is to be used from more than one source, give quantity from each)
in China Canyon off Mill Creek.

5. The use to which the water is to be applied is for domestic purposes including
yard lawn.....irrigation not to exceed $\frac{1}{2}$ ac.

6.

DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

Water is collected from an underground flow from springs in China Creek located in China Canyon by means of a 20" concrete culvert sunk vertical in the ground to a depth of approximately 30". The concrete culvert is the collector reservoir and is supplied from a 4" galvanized pipe running from the base of the concrete culvert at a depth of 24" to 28" underground to the springs in the creek.

A creek rock dam is constructed annually across China Creek in the late spring of the year located immediately below the springs to provide a reserve of water annually upstream from the concrete culvert reservoir.

Pumps or motors have not been used in the water system. From the concrete culvert, the water runs through $1\frac{1}{2}$ " pipe reducing to 1" by gravity flow some 400' north to a 200 gallon water tank buried 18" below ground. Water is piped from the water tank through 3/4" pipe by gravity flow north some 200' to the dwelling located on subject property.

If for domestic use state number of families to be supplied One

7. Construction work will begin on or before System was constructed in 1952.

8. Construction work will be completed on or before Completed 1952.

9. The water will be completely applied to the proposed use on or before In use since 1952.

Application No. 57188

Permit No. 43096

Remarks: The legal description of the property is attached. Also attached is a plat of the subdivision of Blue Mountain Flume Co. showing my property as #1500. F. M. Bensen, a former owner of the property, constructed the water system in 1952 and it has been in service since that time.

Application No. 57188

Permit No. 43096

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.01 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from a series of springs.....

The use to which this water is to be applied is domestic use for one family including the irrigation of lawn and garden not to exceed 1/2 acre in area.....

If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated.....

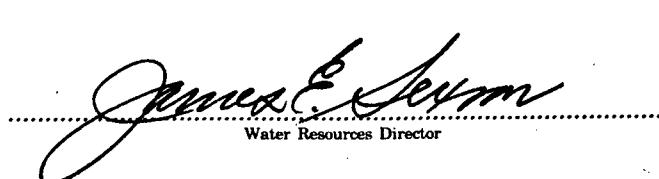

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is March 17, 1978

Actual construction work shall begin on or before June 22, 1979 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19. 80

Complete application of the water to the proposed use shall be made on or before October 1, 19. 81

WITNESS my hand this 22nd day of June , 19. 78

James E. Seymour
